

The Power of Anthocyanins

In ancient times, forbidden rice was once grown exclusively for the Emperors of China to enrich their health and ensure their longevity, forbidding anyone outside the palace walls to even know it existed. When allowed, this anthocyanin rich purple rice was fed to warriors before battle to give them strength, and was thought to perpetuate youth and extend lifespan.

Now, modern science and research is indicating that what the ancients thought may be true! Purple rice is packed with anthocyanins, a flavanoid that has strong antioxidant and anti-inflammatory properties. Laboratory-based evidence has shown anthocyanins' potential health effects against chronic disease and aging, and the results are astounding.

- Anthocyanins like those in purple rice have shown anti-inflammatory and cholesterol-lowering benefits.
- A published study showed that the anthocyanins in purple rice may inhibit arterial plaque development.
- Purple rice, like brown rice, is high in fiber and packed with minerals like iron. However, purple rice has a natural edge with important *anthocyanins*.
- Antioxidants, like the ones in purple rice, have been shown to prevent the degradation of elastin, collagen and hyaluronic acid, which keeps the skin hydrated and firm.

The purple rice cultivated for Alfa PXP Royale is anything but ordinary. This exclusive grain is carefully cultivated in the Siam Valley in Thailand and undergoes a stringent selection process to ensure superior quality and potency.

Find out what ancient emperors and kings knew thousands of years ago... Discover Alfa PXP Royale and provide your body with the antioxidants and revolutionary cellular nutrition it needs.

Revolutionizing Food as We Know It...

After researching thousands of families of rice, one of the world's top rice geneticists discovered the powerful and nutrient-rich purple rice combination which is used in Alfa PXP Royale. These unique and special grains were cross-pollinated for maximum effectiveness. The result is a rice that contains high quantities of anthocyanins with fast-acting double proteins, and is revolutionizing food as we know it!

Typically found in dark red and purple fruits and berries, anthocyanins are the focus of major studies due to the important role they may play in promoting overall health and wellness. Many of the amazing indicated benefits from foods containing anthocyanins seem to stem from their effective anti-oxidant and anti-inflammatory properties.

Alfa PXP Royale is a combination of unique BioReady Nutrients™ derived from a single organic source that includes potent polysaccharide peptides and powerful antioxidants.

Powerful... Alfa PXP ROYALE

Unveiling the Secret of a once Forbidden Rice!

Why is Alfa PXP Royale so revolutionary? Because it is functional food that is supercharged! All the advantages of Alfa PXP Forte with a more potent BioReady combination of faster-acting double proteins combined with potent antioxidants.

Alfa PXP Royale contains a natural combination of profound benefits and properties not found in any other product available. We now bring the exclusive and naturally fortified formula of Alfa PXP Royale to you.

Alfa PXP Royale is a revolution in food as we know it.

Discover the Secret of Forbidden Rice

Alfa PXP Royale is an all natural product made from a specific species of "forbidden rice". Unlike other antioxidant-containing products that are often a mix of various ingredients (fruits, algae, vegetables, etc.), each with different genetic profiles, the antioxidants in Alfa PXP Royale are part of the actual rice itself. It is impossible to insure consistent freshness and potency of products that require a variety of ingredients to give the consumer results; this is not the case with Alfa PXP Royale.

From the time it is planted, to the time it is harvested, the special rice grains used by Enzacta grow with built-in antioxidants, making the final product more consistently potent and pure.

With Alfa PXP Royale, *nothing is added, nothing is removed.*

Twice the Benefit...FAST

To make Alfa PXP Royale, we use the same advanced nano-technology used in Alfa PXP Forte, but with a more potent and faster-acting variety of rice containing beneficial antioxidants that can act as a "coat of armor" for our health. The antioxidants in this rice are adaptogenic, a quality that has shown to protect the cells from various external stressors. This particular species of rice grows with essential polysaccharide peptides and antioxidants already built in!

The quality of natural ingredients in Alfa PXP Royale are an extraordinary upgrade in raw materials. The easily separated molecular bonds in this rice are further broken down by our advanced nano-technology. This contributes to higher absorption levels in the body with up to 99% of the product absorbed by the cells.

Alfa PXP Royale delivers more energy and antioxidants to you *faster!*

Advanced Whole Grain Processing

What makes the exclusive whole grain rice used in Alfa PXP Royale even more extraordinary? Enzacta's proprietary process is implemented quickly after harvest, when the rice is at its peak of potency, keeping 98% of the rice whole. This is important.

Rice is traditionally stored for a period of time after the husk is removed and it begins to oxidize and decay, losing nutritional value. Alfa PXP Royal is processed immediately to preserve the maximum level of nutrients of the whole grain and requires no preservatives.

With Alfa PXP Royale you are getting *superior nourishment to your cells.*

Enzacta's Alfa Family Of Nutritional Health Products

All of Enzacta's health promoting products contain BioReady Nutrients™ (BRNs) that are nutritional complexes extracted, concentrated, and naturally enhanced, for better bio-availability.

The powerful ingredients used by Enzacta are derived from natural sources and transformed into powerful BioReady Nutrients™ through state-of-the-art nano-technology. With Enzacta's powerful natural supplements, your cells receive many of the building blocks that your body needs to live longer and healthier.

Alfa PXP Royale is one of these unique BioReady supplements.

Alfa PXP Royale is a natural BioReady Nutrient© made from an exclusive cultivated species of rice fashioned by Enzacta's nano-technology process into a superfood.

A study published in the Journal of Nutrition in 2008 showed that an ingredient available in purple rice may inhibit plaque development in blood vessels leading to better heart health.

An exclusive mix of rice that was once "forbidden" to the general public, Alfa PXP Royale is a complex fusion of high-quality polysaccharide peptides and antioxidants.
